

Excel Revenue Dashboard

Interactive & Professional Data Analysis Dashboard

Clean data creates clear insights. Clear insights support better decisions.

1. Project Overview

An **interactive Excel Revenue Dashboard** developed to transform raw business data into meaningful insights through **data cleaning, analysis, visualization, and interactive reporting**.

Raw Data → Clean Data → Analysis → Visualization → Interactive Dashboard

2. Dashboard Overview

The dashboard provides a clear and interactive view of sales performance using:

-  **Pie Chart** — Sales by Region
-  **Line Chart** — Monthly Sales Trends
-  **Column Chart** — Sales by Business Segment
-  **Bar Chart** — Sales by Segment and Year
- **Interactive Slicers** — Region & Year

The slicers are connected to the Pivot Tables, allowing users to dynamically filter and explore the dashboard.

3. Data Preparation & Cleaning

Step 1 — Import & Prepare

- Imported the raw dataset into Excel.
- Converted the data into an **Excel Table**.
- Reviewed the data using **Filter** and **Sort**.
- Used **Ctrl + G → Special → Blanks** to identify blank cells.

Step 2 — Handle Missing Values

- **Mode** → Categorical/Text data
- **Mean** → Balanced numerical data
- **Median** → Skewed numerical data or data with outliers

Step 3 — Clean & Format

- **TRIM** → Removed extra spaces
- **PROPER** → Standardized text capitalization
- **M.D.YYYY** → Applied consistent date formatting

4. Pivot Table Analysis

Pivot Table 1

- **Rows:** Region
- **Values:** Sales Amount
- **Chart:** Pie Chart

Pivot Table 2

- **Rows:** Year → Month
- **Columns:** Business Segment
- **Values:** Sales Amount
- **Chart:** Line Chart

Pivot Table 3

- **Rows:** Year
- **Columns:** Business Segment
- **Values:** Sales Amount
- **Chart:** Bar Chart

Pivot Table 4

- **Rows:** Region → Market
- **Columns:** Business Segment
- **Values:** Sales Amount

5. Dashboard Development

After completing the analysis, I created a dedicated **Dashboard** sheet and organized the visualizations into a professional reporting layout.

I added **interactive Region and Year slicers** and connected them to the Pivot Tables, enabling dynamic filtering and exploration of sales performance.

6. Tools & Skills

Microsoft Excel

Data Cleaning • Excel Tables • Filter & Sort • TRIM • PROPER • Date Formatting • Mean • Median • Mode • Pivot Tables • Data Analysis • Data Visualization • Interactive Dashboard • Slicers
